DETAILED ACTION

Applicants amendment canceling claims 1-21 and adding new claims 22-47 is acknowledged.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 22-30, 40 and 44, drawn to mutant DNA polymerase, and a composition comprising said mutant DNA polymerase, classified in class 435, subclass 194.
- II. Claim 31-39, 41-43 and 45-47, drawn to a nucleic acid encoding a mutant DNA polymerase, compositions and host cells comprising said nucleic acid and methods of expressing said nucleic acid, classified in class 435, subclass 194.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are structurally unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the mutant DNA polymerase of Group I, and the nucleic acid encoding the mutant DNA polymerase of Group II each comprise a chemically unrelated structure capable of separate manufacture, use and effect. The peptide of Group I is comprised of amino acid sequence and the DNA of Group II is comprised of

Art Unit: 1652

nucleic acid sequence. The DNA has other utility besides encoding protein such as a hybridization probe, and the proteins can be made synthetically. Additionally, the protein can be used to perform specific biological function(s) which are independent of the function(s) of the DNA molecule.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different literature and sequence searches required for each of the Groups are not required for the other Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
